

# Juno T41

## Office Docking Station

### KEY FEATURES

Easy-to-use recharging function for any model of the Juno T41 and its related extended battery pack

Drop-in docking connects device to charger with a simple click

Connections through Ethernet or USB cables to allow secure physical synchronization of collected field data with back office computers

### THE TRIMBLE JUNO T41 OFFICE DOCKING STATION PROVIDES SECURE SYNCHRONIZATION AND EASY CHARGING

The new Juno T41 Office Docking Station provides an easy way to ensure the Juno T41 handheld computer is automatically recharged and ready for each work day. Your workflow can utilize either Ethernet or USB communication.

Featuring a fast and highly secure physical Ethernet connection, the Office Docking Station allows mobile workers to quickly synchronize field data with central office data servers. This capability is particularly useful in industries such as utilities, agriculture, materials handling and field service where large data sets are common. In addition to an Ethernet mode, the Docking Station supports a USB client mode and DC power input.

The Juno T41 handheld computer Office Docking station also recharges a Juno T41 Extended Battery Pack connected to the unit or on its own.

### Device Compatibility

The Juno T41 Office Docking station is compatible with all models of the Juno T41 computer handheld.
